Rimflush

the ultimate hygiene

El sistema de descarga Rimflush, se caracteriza por la distribución uniforme del agua que, a través de su fuerza, efectúa un lavado perfecto y sin salpicaduras del interior del inodoro. La ausencia del marco cerrado convencional permite la limpieza fácil en las zonas difíciles del inodoro, garantizando así una mejora significativa en la higiene y una mayor eficiencia de la descarga.

Slowclose es un sistema de caída amortiguada que ofrece ventajas en la reducción del ruido y el desgaste de los materiales al minimizar el impacto de la tapa inodoro en el inodoro o el bidé. En el caso de los niños, también previene los accidentes, convirtiéndose así en una solución segura y cómoda para el uso diario.

Los sistemas de doble descarga permiten el ahorro de agua. Nuestras cisternas están equipadas con mecanismos que permiten descargas de 3/6L. ó de 3/4,5L.

Las tapas de los inodoros con mecanismo Easyclip permiten la colocación y retirada inmediata sin necesidad de utilizar herramientas. Con un simple movimiento vertical es posible soltarlo rápidamente, facilitando la tarea de limpieza.

Todas nuestras tapas de inodoro y bidé en Duroplast, proporcionan una protección antibacteriana permanente gracias a una sustancia que es incorporada a la materia prima que impide el desarrollo de bacterias y durante toda la vida del producto. Las rutinas y prácticas de limpieza deben mantenerse para garantizar su eficacia.

El sistema Clipoff permite quitar y poner la tapa del inodoro rápidamente. Viene equipado con dos botones laterales que permiten retirarlo sin necesidad de aflojar ningún herraje. Esto facilita la limpieza e higiene íntegra de la pieza y sin esfuerzo.
